## Entrance Requirements & Additional Selection Criteria

### Diploma programs

The following diploma programs are designated as competitive.

- Combined Laboratory and X-Ray Technology
- Dental Hygiene
- Medical Laboratory Technology
- Medical Radiologic Technology
- Practical Nursing
- Psychiatric Nursing

In order that a program be considered for the Competitive Admission Process, the number of qualified applications must be at least 2.5 times the seat capacity, at each Saskatchewan Polytechnic campus location where it is offered, for two consecutive years.

Competitive programs open for application on October 1, and close on February 15, each academic year. All supporting documentation is required by 4:30 p.m. (Saskatchewan time) on March 1.

International applicants are not generally considered for admission to competitive programs.

In competitive programs, higher admission requirements and/or additional selection criteria may be required. For competitive programs that do not require an overall average in a grade level, GED 12 is accepted in lieu of the grade level standing required by the program.

Admission requirements set the minimum academic standard required for success in a program. The selection criteria for competitive programs are broader than academic requirements. Examples of potential selection criteria include interviews, career explorations and work or volunteer experience.

# First Qualified/First Admitted (FQFA)

The First Qualified/First Admitted (FQFA) process is used for most Sask Polytech programs.

| FQFA applications | Important dates |
| --- | --- |
| Applications open | September 1 each year |

Current high-school students are encouraged to apply as early as possible, on or after September 1 of the year they are enrolled in the grade level required for the program of their choice - and to submit a course schedule as confirmation of registration. This allows the student to qualify conditionally, while completing high school.

High-school students or persons upgrading should apply as soon as they are enrolled in the grade level or courses that meet the admission requirements for the program.

## Admission process

- Admission is offered based on the date you become fully qualified—all your documents and requirements must be complete.
- Seats are filled in order of qualification date until the program and waitlist are full.
- Programs may close to new applications at any time once filled; check the status before applying.
- If you don't receive an offer for the current academic year and reapply during the special window (September 1–15) to be considered for the next academic year, you may retain your original qualification date and stay ahead in the queue (first-choice priority).
- Winter/Spring intakes typically remain open longer. Unplaced Fall applicants may also have opportunities to move to Winter.

If you do not get accepted into the program *"**start date**"* you want, you can look at Regional Colleges.

Some of these colleges are as close as Warman, North Battleford, Humboldt, Biggar.

# What is Apprenticeship?

Apprentices spend approximately 85% of the time *working on the job*, learning the knowledge and skills associated with a trade from a certified journeyperson.

The remaining time (approx. 6-12 weeks a year) is spent in-school training, which reinforces and expands on what is learned on the job.

**OBTAIN EMPLOYMENT**

As an apprentice, you earn while you learn on the job. You graduate with little to no debt.

**PRE-EMPLOYMENT**

Programs are available through Saskatchewan Polytechnic, colleges, or ready-to-work programs.

**OBTAIN EMPLOYMENT**

**REGISTER AS AN APPRENTICE**

As an apprentice, you train primarily on the job. Each year consists of a period of on-the-job learning and 6-10 weeks of technical training.

**YEAR 1**

You may receive credit toward Levels 1 and 2 of your apprenticeship from a pre-employment program.
