## Kindergarten: Nurturing. Exploring. Discovering.

At Greater Saskatoon Catholic Schools, we nurture faith and encourage children to develop their God-given talents and skills. We inspire students to serve others, so they learn how to make their world a better place.

### **Start with a strong foundation:**

Our kindergarten program follows the Saskatchewan curriculum built around these four principles of early learning:

- Children are capable and **competent learners**.
- Development and learning involve the **whole child**.
- **Relationships** are opportunities to learn.
- Stimulating and dynamic **environments** help children learn.

### **In our kindergarten classroom you'll find:**

- A flexible **environment** that stimulates children and inspires them to explore and ask questions.
- **Conversations** between children and teachers, who ask questions, offer ideas and encourage students to trust their own abilities and decisions.
- Children engaged in meaningful play, where they learn to work together, solve problems, express themselves and practice new skills.

### **Our kindergarten program invites children to:**

- Discover and value their inherent gifts.
- Gain confidence through a sense of belonging.
- Understand that they can make a valued contribution to their community.
- Be creative, competent communicators.
- Be curious, lifelong learners.
